# P-value Practice (Totally optional-doesn't count toward grade)

The due date for this quiz is Sun 17 Mar 2013 3:00 PM GMT.

#### **Question 1**

Suppose you fit a linear model relating the two variables displayed in the plot below. Would the P-value for the regression coefficient be significant at the 0.05 level (P less than 0.05)?

#### Sample Data

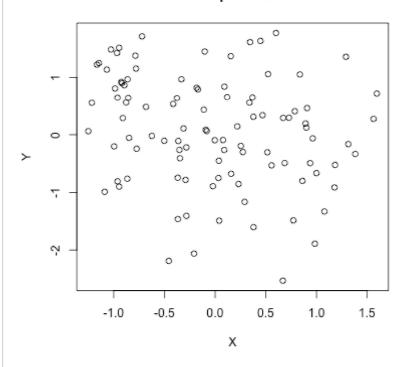

- The P-value is less than 0.05 and is significant.
- The P-value is greater than 0.05 and not significant.

#### **Question 2**

Suppose you fit a linear model relating the two variables displayed in the plot below. Would the P-value for the regression coefficient be significant at the 0.05 level (P less than 0.05)?

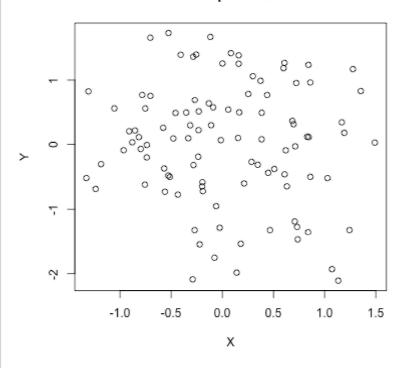

#### Sample Data

- The P-value is greater than 0.05 and not significant.
- The P-value is less than 0.05 and is significant.

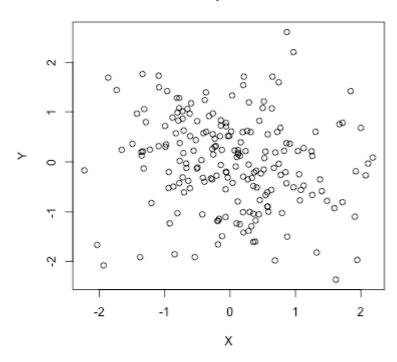

#### **Question 3**

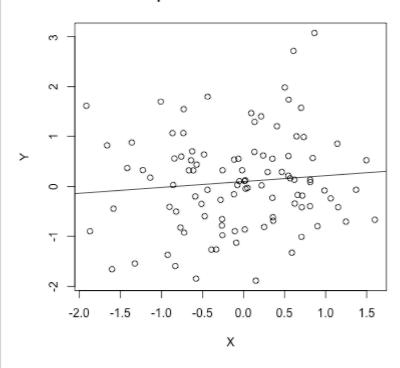

- The P-value is less than 0.05 and is significant.
- The P-value is greater than 0.05 and not significant.

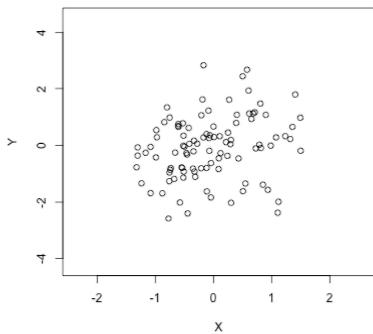

- The P-value is less than 0.05 and is significant.
- The P-value is greater than 0.05 and not significant.

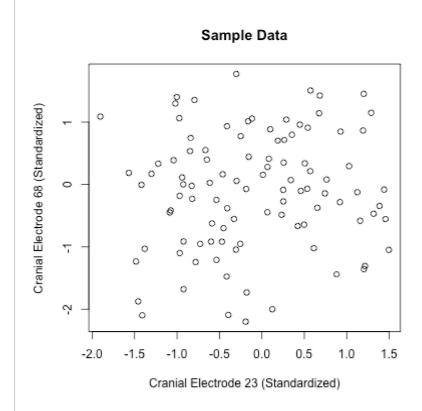

- The P-value is less than 0.05 and is significant.
- The P-value is greater than 0.05 and not significant.

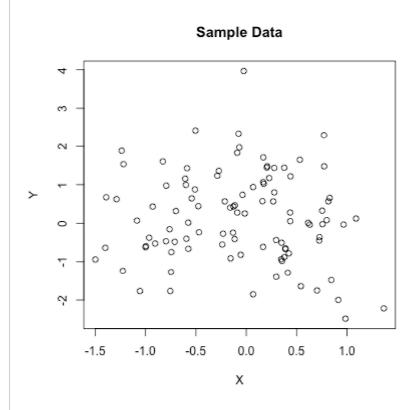

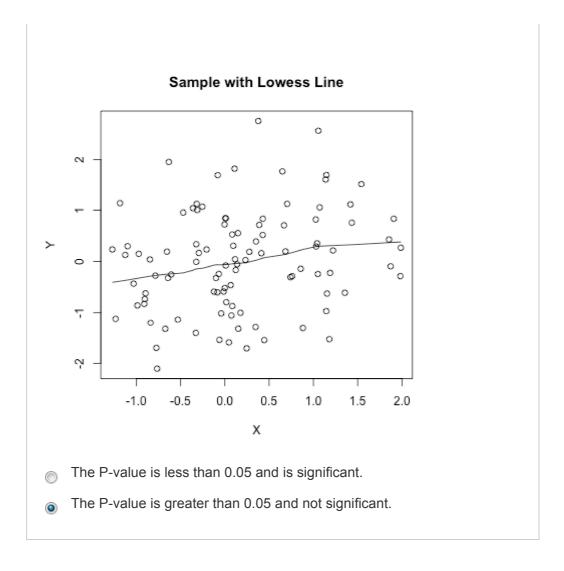

- The P-value is less than 0.05 and is significant.
- The P-value is greater than 0.05 and not significant.

- The P-value is less than 0.05 and is significant.
- The P-value is greater than 0.05 and not significant.

- The P-value is greater than 0.05 and not significant.
- The P-value is less than 0.05 and is significant.
